## xelis Cardiac

Easy and powerful 2D,3D,and 4D tools  
for Coronary CT Angiography and Left  
Ventricle Analysis

## xelis 3D

Enables advanced 3D visualization  
and analysis tools with one-click  
functionality

## Full Package

## xelis Colon

Enhanced CT Colonography solution  
for easy and fast polyp detection

## xelis Dental

Provides complete 3D information to  
optimize treatment planning software

## xelis Lung

Essential tool for the evaluation of the lung and lung nodules, and the comparison of serial exams

## xelis Fusion

Enables you to fuse multi-modality studies, visualize 3D fused images and perform quantitative analysis with speed and accuracy

## Separate Module

## xelis Perfusion\*

# Industrial Background

Advanced visualization solutions bring a number of benefits to the radiology department including a manageable means of handling the massive data output of multislice CT scanners, the ability to produce high-quality reconstructions to enable more accurate and efficient diagnosis of orthopedic trauma, coronary artery disease, aneurysms, colon cancer and last but not least the ability to grow a practice with new exams like virtual colonoscopy or CT angiography.

3D images help clinicians to plan precise surgery and effective treatment by supporting with measurement of location and size of affected area and early detection of disease. And 3D images make communication with patients improved with the support of visualized material for patients' better understanding of their disease. In addition, diagnostic devices like MDCT produce large size of imaging data for better and quick diagnosis and it makes 3D(Advanced Visualization) software positively necessary for effective analysis and precise diagnosis.

# Product Summary

## » Key Features

- Flexible License Type
  - **Full Package** : To use all of the specialized modules to be economically feasible
  - **A specialized module** : It is selective to install & to use a specialized module
- Easy to integrate with INFINITT PACS
- Concurrent User Access
- Regular Upgrade Service : To provide the software upgrade service 2-3 times per year

## » Key Functions (Advanced 3D Diagnosis Support Solution)

### • 3D (BAS)

- 3D Volume Rendering, MIP/MinIP/MPR, Slab rendering
- Automatic bone removal / precise manual segmentation
- Advanced vessel analysis
- 3D Volumetry function

### • Cardiac

- Automatic Axis – Chamber View (HLA, VLA, SA)
- MPR slab review incl. 4D Cardiac MPR and VR
- Automatic blood pool segmentation
- Detection of LV contours and LV Analysis
- Calcium Scoring

### • Colon

- Automatic Centerline Extraction
- Bandview one-pass navigation
- Tagged-stool Overlay on 3D
- Second reading with MDST

### • Lung

- Automatic Nodule Detection(GGO and solid type nodules)
- Automatic grow rate calculation
- Prior-exam comparison

### • Fusion

- Performing two different image sets automatically
- SUV Analysis for PET-CT
- Follow up mode for comparing

Product Information

Advanced 3D visualization

# Product information – Xelis 3D

- ✓ Xelis 3D provides a **diagnostic function** and is useful to **find lesions** for all the diagnostic fields.
- ✓ Main Application : **Angiography, Bronchoscopy, Gastroscopy, Bone, Hepatobiliary, Volumetry, Venography**
- ✓ Key Functions : **Automatic Bone Removal** and **Vessel Analysis** with user friendly Graphic User Interface.

➤ A basic workstation for reconstructing 3D images optimizes routine diagnostic workflow

## Advanced visualization and analysis tools

- **3D view**
  - MPR reformatting, Observing suspicious lesion
- **Path view**
  - Navigation along a path, Reviewing tubular-shaped organ
- **Segmentation view**
  - Supporting 2D manual, threshold-based segmentation
- **Batch view**
  - Generation a series of reformatted image

# Product information – Xelis Cardiac(CVA)

- ✓ Xelis Cardiac provides easy and powerful **2D, 3D and 4D display** and analysis tools for evaluation of Coronary CT Angiography.
  - ✓ Main Application : **Coronary CT Angiography**
  - ✓ Key Functions : **Automatic Removal of Rib Cage, Auricle and ventricle** helps to improve productivity with only **one-click vessel tracking**.
- Xelis Cardiac offers fast and accurate cardiac vessel analysis with comprehensive image analysis and measurement tools, soft plaque analysis and efficient communication for referring physicians and patients.

## Powerful 2D and 3D Cardiac Review

- **Automatic rib cage removal**
- **Auto Segmentation of traced coronary artery**
  - Vessel protection
  - Vessel list
- **Powerful MPR-Slab Review**
  - Cardiac axis view
- **4D Cardiac MPR & VR Review**

# Product information – Xelis Cardiac(CVA)

## ✓ Key Features

- Automatic Cardiac Axis view – Chamber view (HLA, VLA, SA)
- Powerful MPR slab review including 4D Cardiac MPR and VR image to visualize cardiac wall motion and contractility
- Automatic blood pool segmentation, detection of LV contours and LV Analysis
- Calcium Scoring : support for Agatston score and volume measurement

## Accurate and Fast Vessel analysis

- One click auto tracking
- Manual vessel tracking
- C-CPR (Compare Curved Planar Reformation)
- Stenosis analysis with 2-point/  
3-point methods
- Soft plaque analysis
- Calcium Scoring

# Product information – Xelis Cardiac(CFA)

- ✓ Xelis Cardiac(CFA) provides quantitative analysis tools for the left ventricle, including parameters such as ventricle volume, ejection fraction and wall motion
- ✓ Key Function : **LV / RV Functional Analysis, Ventricle Volume Analysis**

## Quantitative analysis tools for the left ventricle

- Multi-phase cardiac CT study loading
- Ventricle Volume Analysis
  - Automatically selected ED and ES phases
  - Automatic LV contour detection
- Ventricle Volume Analysis
  - Ejection Fraction(EF)
  - Myocardial volume
  - Wall thickness (ED/ES)
  - Wall thickening, wall motion, wall intensity

# Product information – Xelis Colon

- ✓ Xelis Colon provides panoramic endoluminal fly-through-commonly called 'Band View' – and the seamless overlay of tagged stool during 3D fly-through, are substantial advances from the conventional endoluminal or flattening display methods.
- ✓ Main Application : **CT Colonography**
- ✓ Key Functions : **Easy-Define-Path, Band View, Tagged-Stool Overlay, Second Reading with MDST**

**Improved Workflow ...  
Accurate Image Analysis ...  
Enhanced Productivity ...**

Xelis-Colon is a dedicated CT colonography (CTC) Solution designed to help radiologists to read CT images more accurately and efficiently.

Xelis-Colon offers greater diagnostic capability through innovative fly-through navigation technique.

# Product information – Xelis Colon

## Band-View

Band-View covers 360 degree.

- New unfolded viewing method without distortion
- One-Pass navigation is sufficient for entire colon wall

# Product information - Xelis Colon

# Product information – Xelis Lung

- ✓ Xelis Lung provides the helpful second-opinion for pulmonary nodule detection on MDCT images
- ✓ Main Application : **Chest CT Interpretation**
- ✓ Key Functions :
  - Fully automatic nodule detection algorithm
  - Automatic GGO(Ground-Glass Opacity) & Solid type nodules Detection
  - Automatic grow rate calculation
  - Prior-exam comparison (Follow-up review)

➤ A basic workstation for reconstructing 3D images optimizes routine diagnostic workflow

## Automatic Lung Nodule Detection

- The detection rate is over 80% for solid nodules (>3 mm diameter) and GGOs (>6 mm diameter)
- Provides the accurate volume size of the detected nodule
- The Growth rate of the detected nodule is important for judging whether it needs a biopsy.

# Product information – Xelis Lung

- Regions labeled as nodules are highlighted on the images for review by a user (Confirm or Reject)
- GGO (Ground-Glass Opacity) type nodules can be automatically detected as well as solid type nodules

Automatically detected nodules:  
Solid and GGO types

VR Rendition of Solid nodule

VR Rendition of GGO nodule

# Product information – Xelis Fusion

- ✓ Xelis Fusion performs two different image sets from different modalities automatically.
- ✓ Main Application : **Nuclear Medicine**
- ✓ Key Functions :
  - **SUV Analysis for PET-CT** such as Body weight, Lean body mass, Body surface area
  - **Follow up mode** for comparing current and previous PET/CT fusion studies

## Multimodality Image Fusion

- Xelis-Fusion enables automatic and accurate image fusion between multi-modalities (e.g. CT-PET, CT-SPECT, MR-PET, MR-SPECT) or single modality (e.g. MR-MR, CT-CT and MR-CT)
- Provides manual registration
- New Fused 3D
  - VR+MIP-with-color overlay

# Business Models

# Set-up Target Customer (Short-term)

1. Sales to Existing INFINITT PACS User
2. Sales to Customers looking for mid or entry level 3D Solution at Community Hospitals with Low Level Application
3. Sales to Customers with Max. 64ch CT Scanners
  - Partnership with CT Vendors / Local Dealers
  - Sales of Rapidia to Customers with 16 or less channel CT Scanners
4. Seminars / Exhibitions / Hands-on Workshop Participation
  - Specialty Seminars (Thoracic & Cardiovascular, Coloproctology, Nuclear medicine, etc.)

# Hospital Survey List

# Sales Point

## 1. Seamless Integration with INFINITT PACS

- Execution Xelis from INFINITT PACS Worklist
- Secure & Easy management of CT Raw Data with INFINITT PACS
- Powerful 2D Viewer & Worklist
- Support Hanging Protocol

## 2. Price

- Flexible License Type (Full Package / Specialized Module(s) only)
- Concurrent User Access
- Price Competitiveness

## 3. Regular Upgrade

- Minor update service 2-3 times per year
- Product Roadmap open for commitment of free Gx upgrade to customer

## 4. Smart Service

- Smart Service package with INFINITT PACS and Xelis

# Top Advanced Visualization Customer Considerations

## Advanced Visualization and Clinical Applications End-user Research: Top Considerations (North America), 2009 (N=103)

Rating Scale Anchors: 1=Strongly Disagree, 5=Strongly Agree

The two statements that resonate best in the mind of U.S. customers is that the advanced visualization solution ought to be either embedded(4.11), or at least closely integrated (4.01) with PACS. If PACS vendors offered the same level of functionality as the specialized vendors, they would be in the best position to deliver this component of the imaging IT ecosystem (3.55), however it is the independent advanced visualization vendors that are in highest regard for delivering the best solutions, higher than the equipment vendors (3.41), even though the latter are often the customers' first go-to-companies (3.35). Further, advanced visualization is increasingly viewed as an enterprise asset (3.80) that should not be confined to the realm of the imaging department and as such, it seems suitable to be a function that is centralized in the IT department (3.32).

Source: Frost & Sullivan

# Configuration

## ❖ Recommended Hardware

INFINITT Xelis 3D software has been optimized through multi-threaded technology and special GPU computing power. Although Xelis 3D runs on the standard PC equipment, we highly recommend installing the software on a recent system to maximize your experience. The recommended hardware specifications are as follows:

- CPU: **Intel Core2Quad CPU** (Q6600, Q6700, Q9300, or higher)
- Memory: **DDR2 PC2-6400 8GB**
- HDD: **SATA/SATA2** HDD (Faster is better), 2 separate physical drives are recommended. (10GB for spool disk, More than **500GB** for image storage)
- VGA: **ATI Radeon HD 3850 512MB** (or higher)
- LCD Monitors: **1600 x 1200 x 32bpp** display (Dual monitor configuration recommended)

## ❖ Operating System (OS)

INFINITT Xelis 3D software has been released with 2 editions in a single installation package, win32 edition and x64 edition. We recommend installing the x64 edition if possible, since the win32 edition of INFINITT Xelis 3D is not able to handle more than 2GB of memory regardless of the physical memory available. To install the x64 (64bit) edition, you have to install one of the 64bit Windows on your system.

- 32bit Windows  
Microsoft Windows XP Home/Professional  
Microsoft Windows Vista Home/Professional/Business/Ultimate  
Windows 7
- **64bit Windows**  
Microsoft Windows XP Professional 64bit Edition  
Microsoft Windows Vista Home/Professional/Business/Ultimate (x64 Edition)  
**Windows 7 (64bit)**
